

FUJI ROYAL ROASTER

R-101

1kg

Fuji Royal roasters are popular for their outstanding ease of handling and reliability, which we have made possible as a company that thoroughly understands coffee beans. Roasting is made easy. 1kg type.

This is a roaster that has a compact body, but has the robustness necessary for business use. It is ideal as an introductory machine for in-house roasting. Installation on the dedicated caster base (optional) makes moving the roaster easy. Cooling box stirring and a dial-type exhaust damper have been included as standard.

※The castor base is sold separately.
